4COSC003W: Trends in Computer Science

Assessment-2: Individual Employability Portfolio

Student Name:	*Sihas Damsilu*
Student ID:	*20240573 / w2181602*
Seminar Day/ Time/ Venue:	*[Enter your timetabled seminar session day - time – venue: e.g. Monday 09:00-11:00h Copland.G.100]*
Published LinkedIn Profile URL:	https://www.linkedin.com/in/sihas-damsilu-6443a3273?utm_source=share&utm_campaign=share_via&utm_content=profile&utm_medium=ios_app
Submission Date:	*Thursday, 9th April 2026, 13:00H*

DECLARATION

I, Gamaethige Sihas Damsilu, Student ID 20240573 declare that:

1. Authorship: This is my own work completed individually.

2. References: All sources have been properly consulted and cited using Harvard referencing format.

3. Originality: This work has not been previously submitted for any other assessment. I have not shared my work with other students or copied from any other source.

4. Generative AI Use: I have disclosed all use of AI tools in the GenAI Log, including a detailed account of all prompts, outputs, and how I used them.

AI tool(s) used: *Chat GPT*

5. Academic Integrity: I understand this work may be checked for plagiarism and that undisclosed AI use constitutes academic misconduct.

Signature: __ _____ Date: _2026.04.09_____

Submission Checklist

Please tick each box to confirm you have completed all requirements:

✓	Checklist Item
☒	COVER PAGE completed, DECLARATION filled and signed
	LinkedIn Profile
☒	LINKEDIN URL: Published LinkedIn URL provided (downloadable LinkedIn CV under Appendices)
☒	LINKEDIN JOB ROLE: Job position advertised URL provided (screenshot under Appendices)
	Elevator Pitch Video
☒	VIDEO is .MP4 FORMAT
☒	DURATION 60 seconds (+/- 15 seconds buffer)
☒	STUDENT ID CARD shown at opening
☒	CAPTIONS/ SUBTITLES added (accessibility requirement, script included under Appendices)
	Personal Development Plan (PDP) Reflection
☒	STRENGTHS AND GAP ANALYSIS
☒	Four SMART DEVELOPMENT GOALS: each with all 5 SMART components
☒	PROFESSIONAL CONDUCT & ETHICS including BCS Pillars
☒	WORD COUNTS: Total 750 words (+/- 10% buffer)
	Employability Activities
☒	Employability activity completion checklist (evidence under Appendices)
	Appendices & Supporting Materials
☒	Employability activity claimed points evidence/ screenshots of badge
☒	LINKEDIN JOB ADVERT screenshots
☒	LINKEDIN PROFILE CV downloaded as PDF
☒	ELEVATOR PITCH SCRIPT/ TRANSCRIPT
☒	GENAI LOG: Included how AI tools were used, with prompts, integration details and evidence screenshots included under Appendices
☒	SUPPORTING MATERIALS: Any other evidence and screenshots included as relevant
	Final Submission Checks
☒	ACADEMIC INTEGRITY: All sources properly attributed, no plagiarism
☒	FORMATTING & PROOFREADING: Document is professionally formatted, Spelling and grammar checked throughout
☒	DEADLINE: Submitting before Thursday, 9th April 2026, 13:00H

Target Job Role Summary

Provide an actual job role posted on LinkedIn Jobs, that captures the essence of your work.

[include screenshots of Job posting under Appendices]

Job Title (exact):	software engineer intern
Company:	Hype Invention
LinkedIn Job Posting URL:	https://www.linkedin.com/jobs/view/4349490689/
Key responsibilities	Develop Python web applications, manage databases (MySQL/MongoDB), and build RESTful APIs.
Essential skills required:	Python (Flask/FastAPI), Database Management, Git version control, and Problem-solving.
Desirable skills required:	Cloud platforms (GCP/AWS), Containerization (Docker), and Front-end basics (React).
Why this role aligns with your interests:	This role perfectly matches my programming foundation in Python and my career aspiration to become a full-stack developer.

Part A: LinkedIn Profile CV

Provide URL for your LinkedIn Profile (aligned with the chosen LinkedIn Job post)

https://www.linkedin.com/in/sihas-damsilu-6443a3273/

Part B: Elevator Pitch – Script

Hi I'm a software engineering student at IIT, passionate about Python development and building scalable web applications. I have hands-on experience with Python And Flask, developing REST APIs and managing MySQL databases. IMO also comfortable with git. Version control and our solid foundation in HTML, CSS and JavaScript. Currently I'm expanding it into fast API and cloud technologies. What excites me about type invention is the opportunity to contribute to real-world projects while continuously growing. Technical and problem-solving skills. I'm a fast learner, A-Team player, and I take pride in writing plain, efficient code. I'm looking forward to contributing to your team.

Elevator Pitch duration:

Time duration of Elevator Pitch:58sec

Part C: Personal Development Plan Reflection

Section 1: Strengths & Gap Analysis

Strengths & Gap Analysis As a first year Computer Science major at IIT, I have been keen on ensuring that I develop a solid technical foundation that meets the changing demands of software engineering industry. The first strength that I have is that I am proficient in Python programming; that is, writing clean, efficient, and maintainable code. I have also gained a good grasp of the logic behind the back-end and practical experience in operating both relational and non-relational databases, including MySQL and MongoDB, which are essentials in the Software Engineer Intern position. Also, my skill in using Git to maintain a code version and my team-building skills in a team setting have been demonstrated by multiple projects in the university. My critical thinking nature enables me to step-by-step trouble-shoot complicated logical mistakes and produce quality software.
Nonetheless, the gap analysis performed in terms of industry standards and the LinkedIn job description indicates that there are key areas of development. Although I have no problem with backend development, I do not have much hands-on experience with Cloud Platforms such as GCP or AWS, which are critical to modern scalable applications. Containerization is another important gap; I should learn such tools as Docker and Kubernetes to learn the microservices architecture and deployment plans. Moreover, I am familiar with the fundamentals of front-end technologies but not with the current frameworks, such as React, which is a highly desirable attribute to become a full-stack engineer. The necessity to fill these gaps is crucial to my development and success in a professional engineering setting.

Section 2: SMART Development Goals (4 goals)

SMART Development Goals To overcome these gaps and to match my skills to industry expectations, I have developed the following four SMART goals:

1. Cloud Computing Competency: By October 2026 I will have finished the certificate of Google Cloud Computing Foundations. I am planning to spend no less than 4 hours each week to learn serverless architecture and infrastructure-as-code. This will help me to implement and operate Python applications in a cloud platform successfully.

2.Containerization Skills: I want to acquire and apply containerization to applications with Docker by December 2026. I will gauge my growth by being able to containerize three of my current Python backend projects and deploy them to a local environment showing my knowledge of microservices deployment.

3.Front-End Framework Integration: I will finish a high-level course of React.js on LinkedIn Learning before February 2027. It will accomplish this through creating a full portfolio project in which a React-based user interface can interact with a Python-based RESTful API, demonstrating my full stack capabilities.

4. API Security and Performance: By April 2027, I will have studied and put into practice advanced API security measures, including OAuth2 and JWT. I will gauge my success by incorporating these security measures into a backend system and make data protection and integrity central to my development process.

Section 3: Professional Conduct & Ethics

Professional Conduct and Ethics The code of conduct that governs my professional conduct as a budding software engineer is the BCS Code of Conduct, which focuses on the Public Interest and Professional Integrity. I realize that I have a basic role to play in ensuring that the software that I come up with is safe and reliable and secure. When it comes to the Software Engineer Intern position, it will be to follow strict testing practices and avoid sacrificing the quality of code in favor of speed. I am also strongly dedicated to Equality, Diversity, and Inclusion (EDI) and make sure to construct user-friendly software solutions that can serve diverse users and reduce the concept of algorithmic bias.

Moreover, I value Data Protection and GDPR compliance, and I make it a point to make sure that every schema of the database or API integrations that I design uphold user confidentiality and privacy. I am also aware of the significance of Sustainability in computing, in the future, I intend to write energy-efficient code, which will help minimize the environmental impact of digital services. In terms of Generative AI application, I am also transparent and accountable, and I would validate all the outputs of AI-assisted in terms of accuracy and security before integrating them. This code of ethics will help me uphold the utmost professional self-awareness and integrity in my career as a computing profession.

Word Counts

Total PDP Reflection (for ALL 3 sections) Word Count: 741

Part D: Employability Award activities

Complete the checklist below and attach supporting evidence record for meaningful engagement of the activities under Appendices.

✓	Employability Activity	Points	Evidence in Appendices
☒	Understanding Employability' activity	20	
☒	Skills Audit	**50**	
☒	LinkedIn - Create an account and get connected	**30**	
☒	Get feedback on your CV	**20**	
☒	Personality Test (Potential.ly PI report)	**20**	
☒	LinkedIn Learning - Pathfinder	10	
☒	Learning LinkedIn' Course	**40**	
☐	LinkedIn Learning - Developing your self-awareness	**30**	
☐	Connect on social media	10	
☐	Join a sports team or society	10	
☐	Attend a Community Event	10	
☒	Attend "Employment Preparation" session organized by IIT	**20**	
☒	Refer "CW2 Supporting Sessions" recordings shared with you and discuss their impact with the tutors.	**20**	
☐	IIT Alumni Tech Talk Series	**20**	
☐	Preparing for Silver - Your progress so far	30	
☒	Enhance your Digital Literacy' - ICT Digital Skills Course - Computer Literacy for Windows / Mac	30	
☐	You Tell Us	20	
	Total points	**260**	

Total Activity Points claimed

260– out of 250 points

AI-use Statement (GenAI Usage Log)

Document your use of Generative AI tools, here. Include prompts, techniques used, and how you integrated or rejected AI suggestions.

No.	Prompt I Used	Technique Applied	How I Integrated AI suggestions	What I Changed/ Rejected and Why
#	What do I have to do here	Basic prompting	I used the AI response to understand the task requirements and structure my work correctly.	*I simplified the explanation and rewrote it in my own words to make it clearer and more suitable for my assignment.*
	Did I do any mistake	*Basic Prompting*	*I used the AI feedback to identify errors and improve my answers.*	*I corrected grammar and wording mistakes but ignored suggestions that did not match my understanding or assignment guidelines.*

[include screenshots of prompts/responses under Appendices]

Appendices

Appendix: Supporting Materials

Include all supporting materials such as job post screenshots, related links, LinkedIn CV pdf, any screenshots of evidence, elevator pitch transcripts, scripts, GenAI usage evidence screenshots (with prompts and outputs clearly visible), and other relevant documentation.

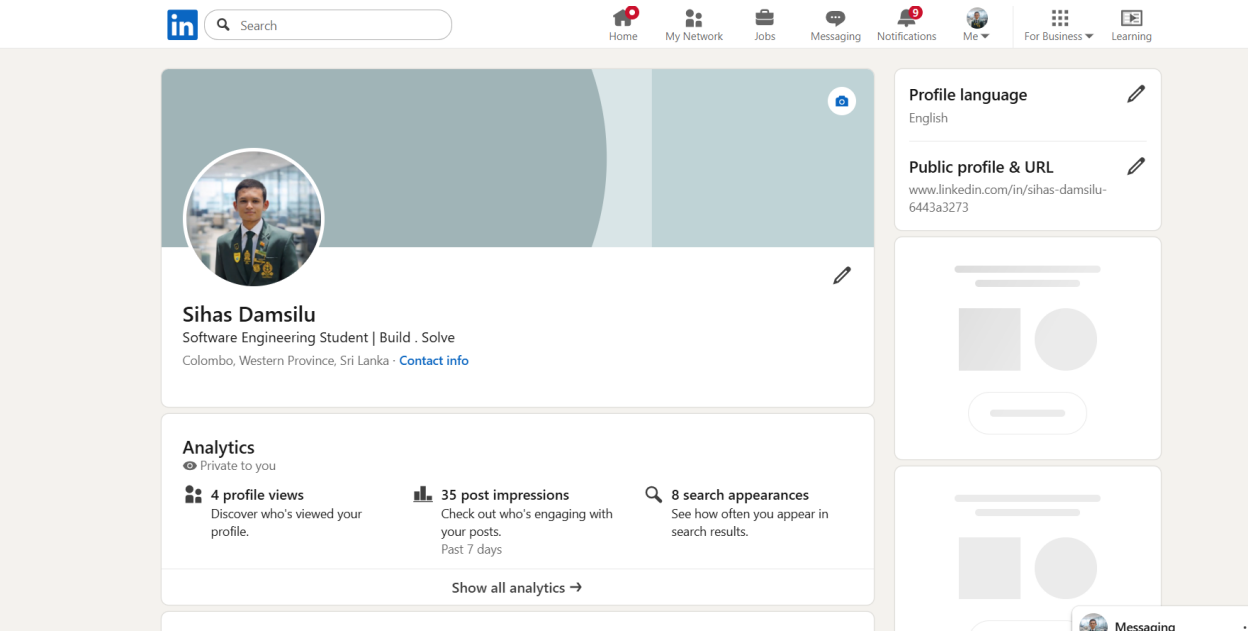
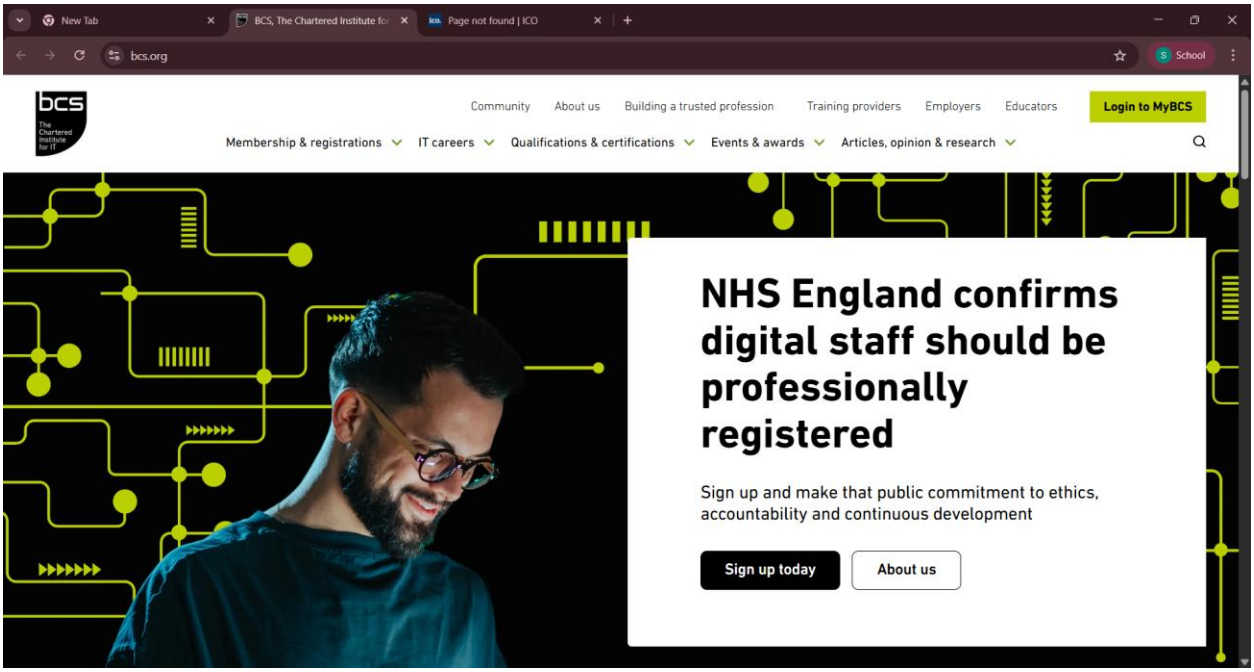
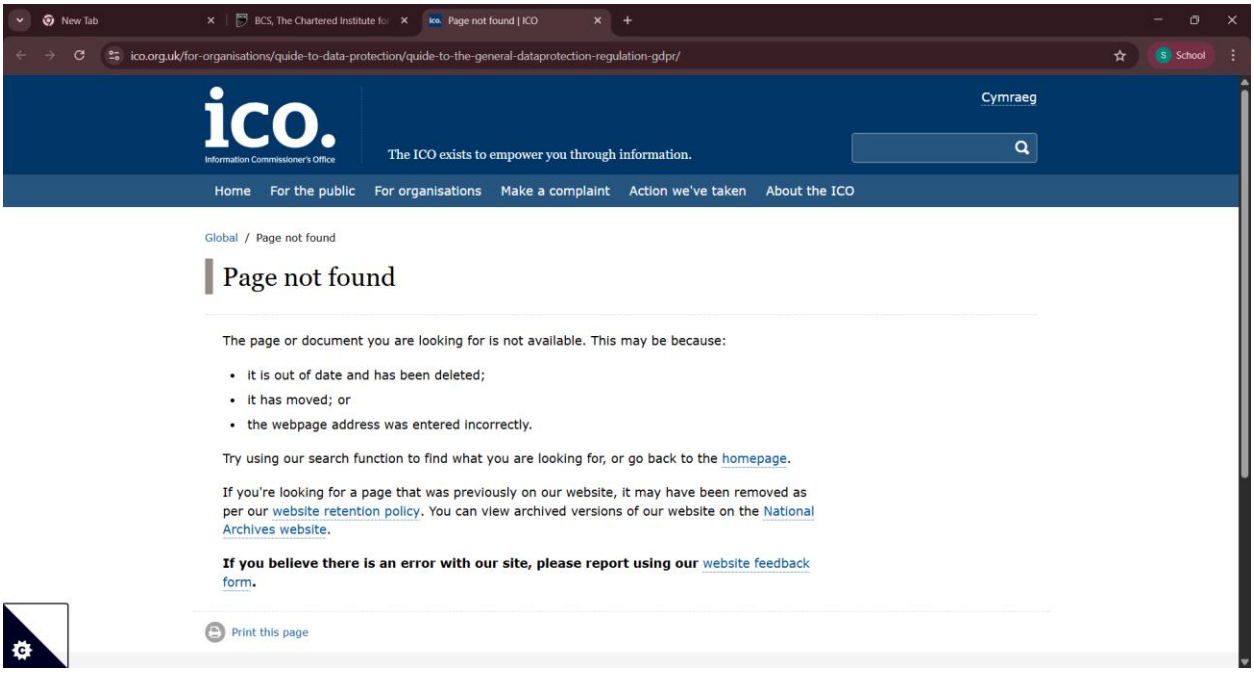
Appendix B – LinkedIn Profile



Appendix C – Elevator Pitch

Appendix D – PDP Evidence





Appendix E – Employability Activities

Gamaethige sihas Damsilu

Summary Report
University of Westminster Indicator taken on
09 April 2026

Core Traits (Strengths)

Trait	Trait description
Drive	Enjoys challenges. Ambitious targets are important for thier happiness. Individuals who score high on this scale have a need to influence their environment and push themselves forward. They set ambitious targets for themselves and display high energy in pursuit of their goals. High scorers are often competitive, and achievement is important for their personal happiness. They enjoy challenging their boundaries, and see overcoming obstacles and stretching themselves as an important form of personal growth. Others may sometimes perceive their strong sense of direction as single-minded and obsessed. Low scorers are less achievement oriented and more accepting of their own and others' limitations.

what do i have to do in here

Alright — this looks like a big document, but I'll break it down **simply so you know exactly what to do** 👇

✅ What YOU have to do (in simple terms)

You need to create an **Employability Portfolio** made of **4 main parts + submission files**.

🎯 STEP 1: Pick a Job (VERY IMPORTANT)

First, choose **ONE real job from LinkedIn** (this drives EVERYTHING).

Examples:

- Graduate Software Developer
- Junior Software Engineer
- Cyber Security Analyst

👉 Then:

- Analyze the job (skills, requirements)
- Research the company

Everything you create must match this job.

🧩 PART A: LinkedIn CV (Professional Profile)

3742307b-dcc7-461d-9068-0af33...
PDF

did i do any mistake

I went through your whole portfolio carefully — and honestly, you've done a **really solid job** 👍
But yes, there are **some important mistakes + small improvements** you should fix before submitting.

I'll break it down clearly:

❗ IMPORTANT MISTAKES (Fix these first)

1. 📅 WRONG DATE in Declaration

You wrote:

> Date: **4/6/2024**

⚠️ This is wrong year.

✅ Fix to:

- **April 2026** (or current date)

---

2. ✍️ Signature is missing

You left:

> Signature: _____

CV
